

Overview

baramundi Automate

Administration Made Easy with baramundi Automate

With baramundi Automate you can automate your installations from the start, including applications that were not even designed to be automated. It is easy to create response files for automatic installations and to automate many administrative tasks using scripts.

At a Glance

- Creation of control files (transforms)
- Automates nearly every process manually executable on a PC
- Simple script creation via drag & drop
- Includes a standard set of commands
- Intuitive recorder for recording actions
- Can also control interfaces that do not conform to the user interface standard (e. g. Java interfaces)
- Context-sensitive help
- Step-by-step trial mode

baramundi Automate supports all **common Microsoft operating systems** like Windows 2000, XP, Server 2003, Vista and Server 2008, Windows 7 and Windows Server 2008R2 per native installation, naturally in both 32-bit and 64-bit versions.

Licensing

baramundi Automate is licensed per administrator workstation. One baramundi Automate license is included with baramundi Deploy. Our [sales team](#) will be happy to provide further information.

Training

The better you know baramundi Management Suite, the more efficiently you will work with it and the more money you will save. We offer special courses on bMS and support you with our technical expertise.

The **baramundi package training** deepens your knowledge of the most important principles of installation mechanisms like bDS, InstallShield, MSI and many more.

For appointments, to register, or for individual consultations, our training management team is always happy to help:
