

Overview

baramundi Deploy

Deploy Software Centrally and Individually with Four Clicks

For many administrators, the really tedious work starts once the operating system is installed and a whole raft of applications need to be loaded. Not so with the baramundi Management Suite. Just a few clicks are sufficient to install all the software a company requires on a computer. You benefit from:

- Intelligent job management with accurate logging
- Smart installation mechanisms
- Freely definable dependencies and bundles
- A strong drag & drop script language
- Reusable tasks

With baramundi Deploy, you can deploy practically any software reliably and automatically, even applications for which such automation was not envisaged by the manufacturer. This is accomplished with a wide range of methods and with the support of useful wizards.

baramundi Deploy supports all **common Microsoft operating systems** like Windows 2000, XP, Server 2003, Vista, Server 2008, Windows 7 and Windows Server 2008R2 per native installation, naturally in both 32-bit and 64-bit versions.

At a Glance

- High level of flexibility through arbitrary installation mechanisms
- Simple job creation and comprehensive job control
- Installations run unnoticed in the background
- End user can be involved if necessary
- Seamlessly integrated license management
- Direct job status information for individual or all jobs

Licensing

Like all modules of the baramundi Management Suite, baramundi Deploy is licensed per managed workstation. No separate server license is required. Our [salesemployees](#) will be happy to provide further information.

Training

The better you know baramundi Management Suite, the more efficiently you will work with it and the more money you will save. We offer special courses on bMS and support you with our technical expertise.

baramundi Packaging training deepens your knowledge of the most important principles of installation mechanisms like bDS, InstallShield, MSI and many more.

For appointments, to register, or for individual consultations, our training management team is always happy to help:
