

## Overview

---

### baramundi Inventory

#### A Clear Picture at all Times

Obtain a precise picture of your devices and software, identify illegally installed software and manage your licenses. With a single mouse-click baramundi Inventory lets you create an accurate inventory of your entire IT landscape and use forms to query offline data like inventory numbers. At the push of a button you know where what device is located and what software was installed.

baramundi Inventory provides reliable support with:

- Hardware inventory
- Software inventory
- WMI inventory
- Custom inventory
- Automated license management
- Informative reporting

baramundi Inventory can take inventory of a client in the network within 30 seconds without disturbing the user. It also takes information from databases or shows the user an on-screen form in which he or she enters specific data: For example inventory numbers of furniture, existing technical literature, telephone numbers – whatever you may need to add to an inventory.

baramundi Inventory supports all **common Microsoft operating systems** like Windows 2000, XP, Server 2003, Vista and Server 2008, Windows 7 and Windows Server 2008R2 per native installation, naturally in both 32-bit and 64-bit versions.

#### At a Glance

- Comprehensive inventory of hardware and software
- Helps prevent under/over-licensing
- Detects illegally installed software
- Automated license management
- Flexible, user-defined general inventory
- Perfect integration into the baramundi Management Suite through a shared database

#### Licensing

Like all modules of the baramundi Management Suite, baramundi Inventory is licensed per managed workstation. No separate server license is required. Our [salesemployees](#) will be happy to provide further information.
