

Overview

baramundi OS-Install

Fast, Fresh Operating System Installs

No matter how complex your IT system is, baramundi OS-Install will make it simple for you to quickly and individually supply hardware with the right operating system.

In both Microsoft compatibility tests and independent studies, the speed and quality of baramundi OS-Install are impressive. But speed alone is not everything. With baramundi OS-Install you can install operating systems to meet your individual needs – automatically and independently.

baramundi OS-Install

- Formats and partitions the client
- Installs natively and configures the system in a single operation
- Does not require further intervention by the administrator

baramundi OS-Install supports all **common Microsoft operating systems** like Windows 2000, XP, Server 2003, Vista and Server 2008, Windows 7 and Windows Server 2008R2 per native installation, naturally in both 32-bit and 64-bit versions. You can also deploy applications just as reliably using [baramundi Deploy](#), which is naturally also integrated in the process.

At a Glance

- Fully automatic and native installation of operating systems
- Automatic detection of hardware and assignment of drivers
- Easy to update
- Integrated license management
- High performance

Licensing

Like all modules of the baramundi Management Suite, baramundi OS-Install is licensed per managed workstation. No separate server license is required. Our [salesemployees](#) will be happy to provide further information.
