

BARAMUNDI CHECKLISTS provide concise, step-by-step expert advice for handling common IT challenges in a straightforward way. You can find more checklists at: www.baramundi.com/checklists

7 reasons to automate third-party software patching

Automated patching of third-party software is your best defense against cyber attackers looking to exploit unpatched vulnerabilities. The baramundi Management Suite's Managed Software service provides patches and security updates for third-party applications as tested packages ready for automated deployment. Here are 7 reasons companies invest in Managed Software.

✓ Security

Automated deployment gives you the decisive speed advantage to close gaps before cyber attackers can analyze and exploit them.

✓ Streamlined Maintenance

Managed Software reduces software maintenance workloads and enables faster deployments of patches and updates for supported applications.

✓ Compliance

Managed Software automatically provides clear, audit-proof, and forensically reliable documentation of which apps were patched and when.

✓ Simplicity

You can customize Managed Software packages and precisely control where and when automated distribution takes place. Updates that normally require user input can be fully automated. Updates can also be delivered via the baramundi Kiosk for user self-service.

✓ Efficiency and Productivity

Prepackaged updates deliver significant time savings, freeing your IT team to focus on higher-priority operational tasks and strategic projects.

✓ Reliability and Quality

baramundi experts carefully curate the list of supported applications and test all patches for compatibility and stability before release. All packages are sealed, and transfers to Management Suite users are encrypted to ensure IT supply chain security.

✓ Visibility and Transparency

You always know which applications are up to date and which are not. Combined with the baramundi Vulnerability Scanner, you get a complete overview of your security status.

Managed Software from baramundi reduces the time required for routine but important tasks and improves your cybersecurity posture. It also supports compliance with KRITIS, NIS2, DORA, and other regulations, as well as common cyber insurance requirements. Learn more about [Managed Software](#) on our website.

ALL ENDPOINTS UNDER CONTROL

The baramundi Management Suite empowers IT teams with the tools and flexibility needed for managing today's hybrid computing environments from any location. Learn more about Unified Endpoint Management with baramundi at www.baramundi.com.
