"The best software for professionals": baramundi awarded "Trusted Solution" by COMPUTER BILD

[Augsburg, March 12, 2019](#) - baramundi software AG was honored in the current "Trusted Solution 2019" survey by COMPUTER BILD and the independent market research institute Statista in the area of Internet and cyber security. More than 3,100 users of software solutions in companies and 28 experts recruited by Statista for IT and software applications were surveyed.

Every year, the "Trusted Solutions 2019" survey conducted by COMPUTER BILD, Testbild and Statista examines which software solutions and digital service offerings enjoy the greatest trust among professional users. The baramundi Management Suite was awarded both a high degree of trust and a high recommendation in the area of Internet and cyber security.

Reliable solutions for everyday working life

145 solution providers were selected in nine main categories. In the Internet and cyber security segment, a total of twelve providers were distinguished by the respondents. baramundi is the only company that enjoys the high level of trust of the users surveyed with a unified endpoint management solution.

Uwe Beikirch, CEO of baramundi software AG, comments on the company's leading position: "As connectivity continues to grow, companies need more than ever a partner for IT security that they can rely on 100 percent. The results of this large-scale user survey show that our 'Quality, Innovation and Support - 100% Made in Germany' approach convinces our customers in this regard. This top position gives us additional motivation to further strengthen our close contact with our customers and to continue our successful product strategy".

Methodology of the "Trusted Solution" survey

Between 29 October and 14 December 2018, the independent market research institute Statista addressed users of software solutions in companies as well as selected IT and software experts by e-mail questionnaire to determine the "Trusted Solutions". More than 3,100 users and 28 independent experts cast their votes.

Trusted Solutions was awarded to anyone who achieved an overall score of at least 80 out of a possible 100 points. The categories were "Trust" with 40%, "Promise of performance, reliability, security, further development" with 30%, "Recommendation" with 15%, "Expert evaluation" with 10% and "Awareness" with 5%.
